Election/Restriction

This constitutes a second restriction requirement. Upon closer examination, it appears that several species are present as best understood in light of the specification. These species have been broken down as detailed below. Certain of the species do not have figures associated therewith and will be identified by the terms used in the disclosure.

1. This application contains claims directed to the following patentably distinct species of the claimed invention: the invention as elected by Applicant on 9/3/02 has numerous species for each of three subcombinations of the invention, (1) the travel limiter, (2) the brake, and (3) the control systems. The species for the travel limiter are: as shown in Fig. 6; in Fig. 15-17; in Fig. 18; the rotary encoder. The species for the brake are: as shown in Fig. 6; internal brake; counterbalance valve and return check valve; drive ratio brake. The species for the control systems are shown in each of Figs. 12, 13 and 14.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3, 13-16 and 46-48 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3623

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
